

elliedelight

the LED art light

[1] Operating Instructions.

Place the light on its stand, plug the supplied power adapter cable into the DC socket and then into the electricity outlet, switch the power on and enjoy the colours, take your time, there's a lot to see.

[2] Colours.

1 = Rainbow.

The light sequences through the colours of the rainbow for several slightly different cycles and then the sequence reverses. This process repeats continually, producing a restful and relaxing linear colour experience.

2 = Polychromatic.

The light sequences through a range of colours which are unique to the design. As the sequence continues the colour relationships slowly shift, creating a fascinating, enlivening and constantly evolving colour journey.

[3] Speeds.

» = **Fast** ~ 5 - 6 seconds. > = **Slow** ~ 12 - 15 seconds.

Speeds are design dependent. At first you will enjoy the Fast speed but after a while you will discover that you start to see more colours from the Slow setting, particularly when you are relaxing and gazing into the light.

[4] Pause / Play / Extra colours

To select the Extra **Warm** or **Cool** colours push the button quickly 3 times.

With the Colour switch in position **1 Warm** colours are shown including red, orange, yellow and purple.

With the Colour switch in position **2 Cool** colours are shown including blue, green, soft yellow and lilac.

Push the button quickly 3 times again to revert to the original colours. To avoid confusion the colours reset to Rainbow or Polychromatic each time the light is turned off and on again.

Push once to Pause the colours, push again to continue and Play the sequence.

[5] General information.

- Use only with the supplied regulated 5 volt DC power adapter. • Clean gently with a soft cloth.
- For indoor use only. • Not suitable for use with a light dimmer.
- LEDs are very energy efficient, there are no bulbs to wear out or replace.
- Power consumption 2.5 watts.
